PENINSULA BEHAVIORAL HEALTH WELCOMES DANIELLE DEOLIVEIRA AS NEW MEDICAL DIRECTOR

Port Angeles, WA – January 21, 2025 – Peninsula Behavioral Health (PBH) is pleased to announce that Danielle DeOliveira will assume the role of Medical Director, succeeding Joe Reis, effective January 21, 2025.

DeOliveira has been an integral part of PBH for over 7 ½ years, providing exceptional clinical care to both adults and children. Over the past two years, she has served as Lead ARNP within our medical department, bringing invaluable expertise and dedication. DeOliveira's experience spans local care and her work in North Carolina, further enriched by her education at the University of North Carolina – Chapel Hill, where she completed her ARNP training. Her earlier career as an RN included work in inpatient, residential, and outpatient settings.

"Our mission is to provide compassionate, evidence-based care to those we serve, and having Danielle join us as Medical Director is a huge step forward in achieving that goal. Danielle's expertise, passion, and innovative approach to behavioral health will empower our team and enhance the lives of our clients in profound ways. We couldn't be more excited for the future under Danielle's guidance," said Wendy Sisk, PBH CEO.

In addition to her clinical achievements, DeOliveira has demonstrated exemplary leadership as an active member of the Association of Advanced Practice Psychiatric Nursing, where she is the incoming President-Elect.

We also take this opportunity to thank Joe Reis for his many years of dedicated service. Under his leadership, PBH achieved significant advancements in the medical department, including the establishment of our Spravato clinic, Autism Center of Excellence, implementation of Kaizen standards and served on our Executive Leadership team.
